

No. of Functional Features Included in the Solution

Date	7 JULY 2026
Team ID	XXXXXX
Project Name	Personalized Networking Assistant
Maximum Marks	5 Marks

Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	Thematic Classification	Zero-shot semantic event analysis. Extracts topics (e.g. Fintech, MedTech) from the event bio automatically.	event_analyzer.py / FactVerifier.tsx	Done	1
2	Tailored Conversation Starter Generator	Generates tailored networking lines grouped into 3 distinct context tracks (Icebreakers, Topic-Specific, and Goal-Oriented).	topic_generator.py / GenerateStarters.tsx	Done	1
3	Wikipedia Live Fact-Check	Interactive entity query verification system to live-validate professional claims using MediaWiki API.	fact_checker.py / FactVerifier.tsx	Done	1
4	Past Generation History Cache	Saves and reloads past networking scenarios with search and category filter.	PastHistory.tsx	Done	1
5	Feedback Evaluation Engine	Interactive thumbs-up/down qualitative feedback logging system on every conversation starter.	PastHistory.tsx / App.tsx	Done	1/2
6	Dual Stack Core Platform	Fully responsive TypeScript React client paired with alternative Python FastAPI companion code.	Main workspace & /python_reference	Done	1/2

Feature Summary:

Metric	Count / Value
Total Features Planned	6
Total Features Implemented	6
Core / Must-Have Features	5 (Classification, Starter Generation, Fact-Check, History, Feedback)
Additional / Nice-to-Have Features	1 (Dual programming language architecture / Streamlit Developer Reference)
Features Tested & Verified	6

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	3	Beautiful layout, collapsible history timeline, and animated slide-over verification widgets.
2	Backend / Logic	2	Node.js routing and FastAPI controller endpoints.
3	Database / Storage	2	LocalStorage persistent structures and cached validation lists.
4	API / Integration	2	Wikipedia MediaWiki REST and Google Gemini APIs.
5	Security / Authentication	1	Input cleansing, API key variable protection via server-only execution.
